

Dear colleagues

Happy New Year to everybody!

Please consider submitting an abstract to our session "Particle acceleration mechanisms in space plasmas: observations and theory" at upcoming EGU General Assembly, 23-28 April 2017, Vienna.

The session description can be found here:

<http://meetingorganizer.copernicus.org/EGU2017/session/24859>

This year the session has a special focus on the topic of particle energization in turbulent plasmas, which is the science objective of the THOR mission proposal (<http://thor.irfu.se/>).

The deadline for abstracts is 11 January 2017, 13:00 CET.

Best regards

Alessandro Retinò

on behalf of the ST 1.6 conveners
