

European Space Weather Week 14,
Belgium, 27 November – 1 December, 2017
<http://www.stce.be/esww14>

1st Announcement *** Call for contributions to all sessions ***

The ESWW is the main annual event in the European Space Weather calendar. The ESWW will again adopt the central aim of bringing together the diverse groups in Europe working on different aspects of Space Weather.

The ESWW14 content is community driven and the agenda involves a broad variety of activities with different concepts. The selected sessions addressing a wide range of scientific and application related themes are presented here: <http://www.stce.be/esww14/program/sessions.php>

The Programme Committee is pleased to invite contributions to all sessions. Each session is split into poster and oral components. The poster programme emphasises discussions and interaction between people and this year is enhanced so that all posters are up for two days. The oral part will consist of both invited and contributed talks.

Submission is done via the ESWW14 website (see above).
Strict deadline for contributions is 31 May, 2017 included.
Deadline for invited orals is 30 September, 2017 included.
Deadline for late poster (only) contributions is 1 November, 2017 included.

Any updates and further information will be posted here:
<http://www.stce.be/esww14/sessiondeadlines.php>

Sincerely

Mauro Messerotti and Petra Vanlommel, Jean Lilensten on behalf of the PC
