

Message de jean Lilensten <jean.lilensten@univ-grenoble-alpes.fr>

Chers collègues,

En 14 ans, la ESWW est devenue l'un des rendez-vous annuels majeurs de la discipline. A mon goût, il y a à la fois trop peu de Français participants et trop peu de Français conveneurs de sessions. Je vous communique ici notre premier appel à session, en espérant qu'il recevra votre attention.

Bonne année à toutes et à tous,

Jean

European Space Weather Week 14
Belgium, November 27 – December 1, 2017

Call for Sessions – first announcement

Dear colleagues,

Each year, during the European Space Weather Week (ESWW) conference, people from all over the world gather to discuss the newest insights in space weather and try to find appropriate answers to the challenges and threats that space weather imposes. Science, data exploitation, observations, service development, operational models, engineering, industrial challenges, etc. are all relevant aspects of space weather.

One of the strengths of the conference is that the participants can contribute largely to its content. We start filling the ESWW14 programme with formal sessions that are organised by a fixed format, see:

<http://www.stce.be/esww14/session.php>

We would like to invite and encourage you and your colleagues to submit proposals for sessions on ESWW14.

The ESWW Programme Committee (PC) will decide which of the submitted sessions are accepted. Accepted sessions will be allocated a timeslot for orals and the PC assigns immediately a date. Session conveners will be notified mid February.

Session proposals can be submitted from January 16 onwards at <http://www.stce.be/esww14/call4sessions.php>. The deadline for submission is January 26, 2017 5PM (CET).

With kind regards

Mauro Messerotti and Petra Vanlommel, on behalf of the ESWW PC
