**** Submission of abstracts to sessions ****

Dear ESWW enthusiast

A while ago, the ESWW2018 Programme Committee launched the Call for Sessions. Thanks to all who contributed! The PC is now working hard to get the list of sessions streamlined. By the end of March the list will be published.

The *submission of abstracts to sessions* opens *on April 1*, without joking. The *deadline* for submission is *May 18*. We appreciate that these dates are earlier than for previous editions of ESWW, but this is necessary to avoid logistical issues that have arisen in the past.

You are probably thinking: 'This is too early!'. But we are convinced that this shouldn't be a problem. In fact, you know what you are working on, and you don't have to present results in the abstract, just keep them for the conference.

Submission of contributions to sessions will be blank by default. The session conveners will assign the label 'poster' or 'oral'. If you prefer to have a poster and no oral presentation, you can indicate this choice in the submission form. You will be notified if, in case of acceptance, whether you have been assigned a poster or an oral presentation by the end of June.

For now, you can find information about the format and sessions at the URL: <http://www.stce.be/esww2018/session.php>

We will notify you when the list of sessions is published and when the submission of abstracts opens.

Kind regards

Mauro Messerotti and Petra Vanlommel, on behalf of the Programme Committee
