

8th International Workshop on Planetary, Solar and Heliospheric Radio Emissions (PRE 8) in last week of October this year

The PRE 8 workshop deals with the most recent developments in the study of non-thermal radio emissions from the Sun, the radio planets, the heliosphere, and from extrasolar sources like exoplanets or brown dwarfs. Special emphasis is put on current spacecraft missions (Juno, Cassini, Van Allen Probes etc.), but also new developments in ground-based radio telescopes will be matters of discussion, which should lead to a better coordination of ground- and space-based observations.

PRE 8 is the continuation of a series of workshops that took place in Graz in 1984, 1987, 1991, 1996, 2001, 2005 and 2010. PRE 8 will take place October 25-27, 2016, in the conference hotel "Schloss Seggau", which is located about 30 km south of Graz near the town of Leibnitz in Austria.

For more information please visit our website at <http://pre8.oeaw.ac.at/index.php>. Registration and abstract submission are already open. The abstract deadline is on Monday September 5.

On behalf of the organizing committee I am looking forward to your abstract submission.

With my best regards and have a nice summer,

Georg Fischer (Chair of SOC and LOC)
