

October 29 - November 2, 2018, in Belgium about 1 hour from Brussels.

<http://sdo2018.lws-sdo-workshops.org/>

We are pleased to announce the 2018 Solar Dynamics Observatory Workshop.

It has been almost eight years since the launch of SDO. We have seen a blizzard of papers and science results from this mission. As Solar Cycle 24 fades, we will get together to discuss what we learned about the Sun and anticipate what Solar Cycle 25 will look like.

This workshop will include invited and contributed oral and poster presentations in several theme sessions and one day of parallel mini-workshops. We encourage your participation and hope that you will share this announcement with colleagues.
