

Dear Colleagues,

We are writing to inform you that the Plasma Physics Group at Imperial College London has an open position for a new academic staff member in the area of theoretical plasma physics. The position is at Lecturer level (tenured faculty appointment, equivalent to tenured Assistant Professor in US universities).

We're looking for a theoretical plasma physicist with research experience in the following areas: high energy density plasmas; inertial confinement fusion; MHD plasma modelling; fundamental plasma processes such as reconnection, turbulence and shocks; laser-plasma interactions including particle acceleration; experimental laboratory astrophysics.

If you know of qualified candidates, please feel free to pass the attached ad on, bring them to our attention, or have them contact us directly. The attached ad has more details and a link to the relevant Imperial College web-site with the full details of the post and of the application procedure.

The application deadline is April 30, 2018.

Link to ad on the Imperial College web-site:
