

Message de Christian Mazelle <cmazelle@irap.omp.eu>

Bonjour,

Je vous transmets cet appel d'un collectif de scientifiques pour dénoncer la situation dramatique de la recherche scientifique en Argentine conséquence de la politique de coupes budgétaires de l'actuel gouvernement de ce pays.

Si vous souhaitez apporter votre soutien à nos collègues argentins, il suffit d'envoyer un message à cienciaenargentina@gmail.com avec votre affiliation.

N'hésitez-pas bien évidemment à redistribuer cette information autour de vous.

Amicalement,

Christian

Dear all,

I am writing as you told me to let you know of efforts lead from the international community to support the Argentine scientific sector in the middle of the radical budget cuts being made by the current government.

Well, here is an initiative led by a group of colleagues intended to increase the awareness of the crisis we are ground through and to give people like you the chance to join us in speaking out against these cuts.

Please feel free to disseminate this email to those around you who might be interested in joining.

All the best,

Cesar

.....

Dear colleague:

The recent decisions of the President Macri's administration in Argentina, added to a decided policy of adjustment carried out since 2015, force us to ask your kind cooperation to denounce the state of crisis in which Argentine science is immersed. We enclose a brief letter describing the events and we would be grateful if you would support us by signing this letter that we are e-mailing to colleagues of the international scientific and academic community.

If you agree to support our initiative, we simply ask you to send an email tocienciaenargentina@gmail.com with your affiliation and we will include your name in the list of signatures.

Thank you very much for your support.
