European Space Weather and Space Climate Association

E-SWAN

To unite, sustain, and develop
Space Weather and Space
Climate activities in Europe

E-SWAN Mission

- Organisation or co-organisation of conferences and/or other space weather and space climate (hereafter “SWSC”) topical events in Europe
- Complementary distribution of media for dissemination of scientific knowledge;
- Support for early career scientists working in Europe by providing advice and fostering communication;
- Promotion of education and advanced training through continuing education opportunities within Europe;
- Maintaining and enhancing international cooperation (globally);
- Honouring and promoting outstanding scientific achievements and scientists by conferring awards and medals;
- Outreach to promote SWSC (with a focus on Europe);
- Fostering the creation of networks of scientists, engineers, stakeholders, and end-users in order for them to organise joint activities mainly in Europe;
- Raising awareness and providing support to all activity sectors possibly affected by space weather and/or space climate focussing within Europe;
- Supporting editorial/publication activities related to SWSC (e.g. journal, press releases);
- Lobbying and influencing the agenda and work programmes of national and international organisations and decision makers in favour of SWSC with a focus on Europe;
- Collaborating with other similar international organisations; and
- Aiming to represent the European SWSC community in other communities and other areas of the world.

Why join E-SWAN

By joining the association, you will become an actor of the future of the discipline. You will be entitled to participate to the General Assembly, to vote to decide the Association orientations, to present yourself for a mandate, to elect its Executive Board. You will be allowed to create a new Committee devoted to specific tasks. You will also liaise with all other existing bodies involved in space weather and space climate activities worldwide.

The mission of E-SWAN is to unite, sustain, and develop Space Weather and Space Climate activities in Europe. E-SWAN will immediately be the natural host for the European Space Weather Week Program Committee, for the Journal of Space Weather and Space Climate Editorial Committee, and for the Space Weather and Space Climate international Medals committee. It will represent the community at large, including stakeholders, forecasters, scientists, product providers, ... Still, E-SWAN is open to members from any country throughout the world, although one needs to work in Europe to belong to the Executive Board.

We therefore look forward to welcome you into E-SWAN. To become a member of E-SWAN you may register on our website for a membership fee.

However, you may become E-SWAN member for free in 2022 only upon registering for the European Space Weather Week 2022.
